

TUBE-O-MAT NX

Feeder for weaners and finishers.
Meets the pigs' need for activity

- Up to 50 pigs per feeder; from 6 to 120 kg
- 120 L feed volume
- Perfect for both meal- and pellet feed
- Extremely long durability
- Minimum waste of feed

Components for modern pig production

FRESH WATER AND DRY FEED IN ONE FEEDER

The feeding principle considers the natural manipulation behavior, as the pigs must activate the feeder to get feed. Consequently, the trough is cleaned and free of feed residues, which helps maintain a high level of hygiene.

The TUBE-O-MAT NX hopper is shaped with almost vertical sides to prevent bridging. The trough has double drinking bowls, allowing the pigs to choose water or dry feed. Taking water and feeding simultaneously also reduces stress in the group. You can measure the effect: excellent daily gain from wean to finish.

TUBE-O-MAT® NX CLASSIC

This is especially developed for finishers. It is supplied with an extra strengthened feed outlet, thus it can withstand the large pigs' constant activation. The trough of the CLASSIC model is designed to help keep the feed and the water from being mixed together.

TUBE-O-MAT® NX VI+

The activating part on VI+ models is made of stainless steel and is designed for both piglets and finishers. Simple and very strong. Besides there is a transparent lid, that can be opened for cleaning purposes.
