- Always fresh feed and water
- Easy to clean
- Reliable and easy to operate
- Adjustable mixing ratio between feed and water
- The trough is designed for pigs from 4 kg
- Up to 60 pigs per feeder

BABY FEEDER

Unique method to mix feed and water

Feeder with sensor

Baby Feeder is a feeder that can be used by even the smallest pigs from 4 kg. The unique design of the feeder makes it possible to mix feed and water inside the trough, which ensures better hygiene and cleanliness. Feed automatically fills when sensor indicates that the trough is empty, according to the adjustable time frame.

Trough

Our Baby trough is long, and it makes it easy to build it between the partitions in a pen. The trough dimensions, front height and width are adjusted to the smallest pigs.

Feed automatically fills when sensor indicates empty trough, according to the adjustable time frame.

Water and feed are mixed in the bottom of the trough.

FACTS

WATER	Water connection	8 mm hose provided, length 3 m
	Water pressure	2,5 bar (recommended)
ENERGY	Energy plug	Schuko plug as standard
	Cable	4,5 m
	Connecting	No electrician needed
