

BABY FEEDER

Fresh mix of feed and water
in small amounts – 24/7

- Saves small pigs, even the smallest ones from 4 kg.
- Survival and growth acceleration.
- Sensor feeding at pen level.
- Mix feed and water inside the trough.
- Always small amounts of fresh soaked feed, mixing water and feed. Easy to digest.
- You can control/adjust how quickly it should mix again.
- Adjustable pause periods tailored to the barn's needs.

THE BEST START FOR PIGS AFTER WEANING - FOR PIGS FROM 4 KG

Baby Feeder is a feeder that can be used by even the smallest pigs from 4 kg. The feeder's unique design makes mixing feed and water inside the trough possible, ensuring better hygiene and cleanliness. Feed automatically fills when the sensor indicates the trough is empty, according to the adjustable time frame.

Our Baby trough is long, making it easy to build between the partitions in a pen. The trough dimensions, front height, and width are adjusted to accommodate the smallest pigs.
