

## BOX FEEDER

Feeder for weaners and finishers

- Easy access to feed
- No sharp edges
- Easy to clean
- Minimum feed waste
- Main frame made of strong stainless steel
- Accurate regulation of feed amount
- Highly resistant

# BOX FEEDER

Feeder for weaners and finishers

BOX FEEDERS are designed to give pigs easy access to fresh feed, which is necessary to ensure modern pig production.

ACO FUNKI offers BOX FEEDERS for weaners and WEAN-TO-FINISH, where dry feed can be distributed directly from the downpipe to the feeder. If you want the possibility to mix dry feed with water, we recommend using WET/DRY FEEDERS.

## Reduced feed waste

The design of the Box feeder contributes to minimal feed waste. The pigs have easy access to the feed and with the precise regulation of the feed amount it is perfect for reducing feed waste.

## Durability

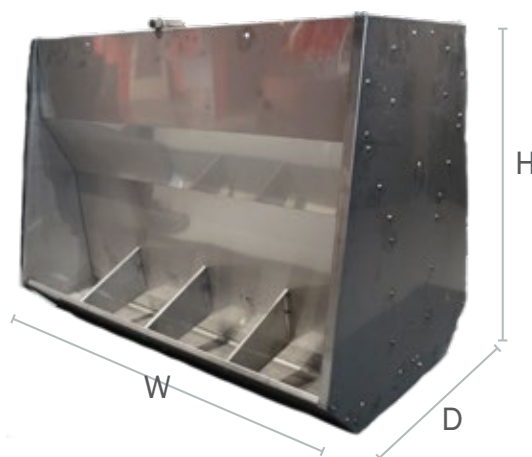

The Box Feeder is made of 100% 304 stainless steel provides good value for money. The solid and strong material makes them durable and thus very long-lasting. There are no sharp edges.

- **MATERIAL:**  
Stainless steel type 304, corrosion resistant
- **THICKNESS:**  
1,2 mm
- **TROUGH FRONT EDGE HEIGHT:**  
For weaners 100 mm  
For finishers 110 mm
- **TYPES:**  
For weaners and finishers  
Single and double  
For dry feed or feed-water mix

BOX FEEDERS STAINLESS STEEL - TYPE OVERVIEW					
Description	Article nr.	Spots/ Rooms	Width (cm)	Hight (cm)	Depth (cm)
Weaners Single	560355	4	80	70	29
	560356	6	120	70	29
	560357	8	160	70	29
Weaners Double	560360	4	80	70	47
	560361	6	120	70	47
	560362	8	160	70	47

# WET/DRY FEEDER

Designet to mix dry feed and water in the same trough

WET/DRY FEEDER for weaners and finishers are designed to meet the specifications and expectations of modern pig production.

The construction provides long-lasting durability, easy cleaning, simple handling, and high feed efficiency.

- **MATERIAL:**  
Stainless steel type 304, corrosion resistant
- **TROUGH FRONT EDGE HEIGHT:**  
For weaners 100 mm  
For finishers 110 mm

Drinking water for the pigs comes from pressure valves in the trough.

Simple and precise adjustment of feed amount.

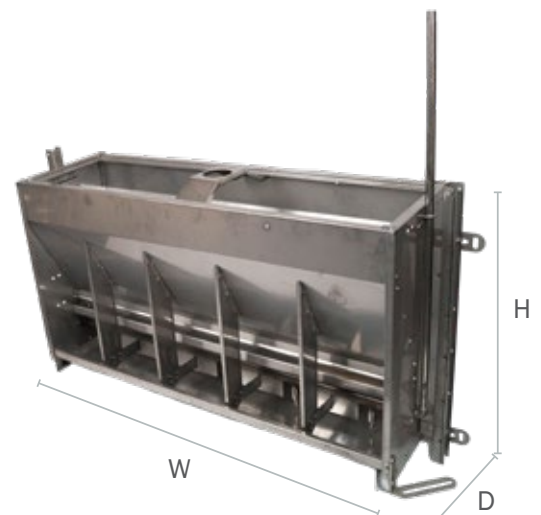

The feed comes directly from the down pipe
