

TUBE-O-MAT

The Best Choice for Weaners,
Finishers, and Wean-to-Finish Pigs

- Ensures better animal welfare – feeding principle meets the pigs' natural rooting behavior needs.
- Many adjustment options – both in height and rotation.
- Easier to achieve a thin feed layer to reduce CO2 and feed waste.
- Optimal airflow provides a better climate for the pigs and stimulates feed intake.
- Easy for staff to operate, and the feed quantity in the hopper can be seen from a distance.
- Pigs can feed from both sides of the trough and stimulate each other, resulting in higher feed intake.
- Easy cleaning and drying after washing.

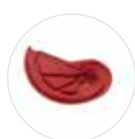

Components for modern pig production

MANY ADJUSTMENT OPTIONS – BOTH IN HEIGHT AND ROTATION

Designed with the natural rooting behavior of pigs in mind, TUBE-O-MAT ensures that pigs must activate the feeder to access feed. This unique feature not only stimulates natural behaviors but also keeps the trough clean and free from feed residues, maintaining superior hygiene levels.

TUBE-O-MAT® CLASSIC

Specially developed for finishers. It is supplied with an extra strengthened feed outlet, thus it can withstand the large pigs constant activation.

TUBE-O-MAT® VI+

The activating part on VI+ models is made of stainless steel and is designed for both piglets and finishers. Simple and very strong. The transparent lid can be opened for cleaning purposes.
