

FUNKI FIBER

Durable material for housing equipment

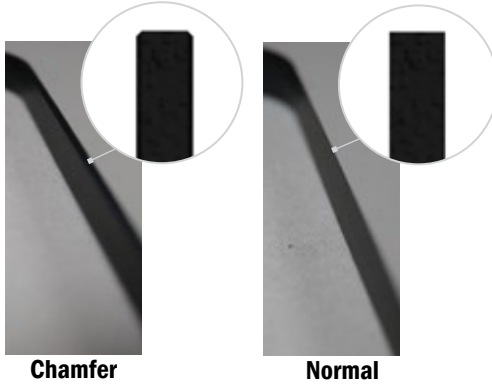

- Solid compact plate 10 mm thick
- Very strong and durable
- Suitable for housing equipment
- Smooth surface
- Easy to clean
- Private label
- EN420 certificate

Funki Fiber

Durable material for housing equipment

ACO Funki can produce "private label" fiber plates of very high quality. Our CNC machine can make many different solutions, for example, chamfering. ACO Funki can also deliver fasteners and handles for the penning equipment.

DURABLE MATERIAL

FUNKI FIBER equipment is made of fiber plates and has a thickness of 10 mm. It makes it space efficient without compromising the quality. Fiber plates are very strong and durable.

SOLID EQUIPMENT

FUNKI FIBER is suitable for housing equipment for pigs and cattle, among other things. The equipment is available with chamfered edges, which minimizes the risk of injuries. The equipment helps to maintain a high level of hygiene, and is bacterial.

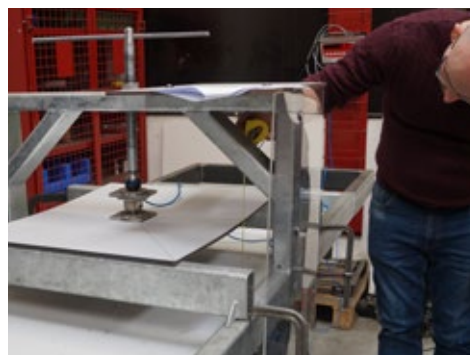

AVAILABLE OPTIONS:

- Different hole sizes
- Elongated circles
- Rounded or squared edges
- Chamfering
- Maximum size: 130 x 420 x 1 cm
- The plates are available in a light grey color
- Individual design / according to your drawing ("private label")

Scan QR code and watch video:

QUALITY CONTROL

The quality is very important, so the fiber plates undergo several tests to ensure top quality. The testing takes place in Denmark and include the following procedures:

- Thickness control
- Measurement of the plates' resistance to immersion in boiling water
- Test of the plates' impact resistance
- Test of the plates' flexibility
- Test of the plates' flexibility (II)
- Test of the plates' hardness in surface and core

Subject to changes in materials and design is reserved.
