1.7d	0131-184	ADAPTOR FOR VD5 AND VD6 Ø60/Ø50	2
1.7e	0131-183	ADAPTOR FOR VD5 AND VD6 Ø60/Ø38	2
2	0221-975	VD5 VOLUME DISPENSER 7 LITER	1
2.1	0221-920	TOP FOR VOLUME DISPENSER VD5	1
2.2	0221-923	SHUTTER VD5	1
2.3	0221-922	LID FOR VOLUME DISPENSER VD5	1
2.4	0221-980	BOTTOM FOR VOLUME DISPENSER VD5, LOW	1
2.5	0221-992	VD5 SCALA LABEL, LITER/KILO FOR CENTRAL FUNNEL	2
2.6	0221-930	VD5 BALL COMPLETE	1
2.7	0221-933	WIRE FOR BALL VD5	1

MOUNTING THE FUNNEL

Such placement also OK, you must first cut that edge.

MOUNTING THE VOLUME DISPENSER

Mounting on Ø60/Ø75

Mounting on Ø38/Ø50/Ø55

Volume dispenser installed in the following way:

Adapter is clicked on the VD5.

The closing shutter is placed in the adapter.

Transition kit is mounted on the transport tube.

The springs is placed in the hole furthest away from you. Draw spring toward you until it is installed correctly.

Springs are mounted without tools.

CORRECT MOUNTING OF STRING

Pull direction

Make sure that the piano wire, washers, and wire are assembled in the correct order.

- The wire is inserted first and secured with a washer.
- The piano wire is then inserted and secured with another washer.
- Finally, the top part of the lock is tightened to hold everything in place.

POSSIBILITY FOR PLACEMENT OF VOLUME DOSES

- For single food containers, volume doses are placed at a distance. Piano wire goes through the eye in the spring.

- In the case of double feeding boxes, volume doses are placed close to each other, piano wire lies over the spring.
- When placing piano wire like this, a wire extension 0221-710 must be used every 3 m, to prevent the wire from becoming slack.
- If the volume dispensers are not fixed on the downpipe, clamping band 90260 must be used.
- The wire elevation is mounted on the feed tube using clamps set 39900102 - Ø38, 39900104 - Ø50, 39900103 - Ø60, 39900105 - Ø76.

REDUCER INLET

0221-927- VD5 reducer inlet, reduce feed by 0.45 L.

INSTALLATION OF DOWN PIPE

INSTALLATION OF THE RELEASE SYSTEM

Mounting on wall:

For mounting of 2 wires on 1 release system, it is necessary to mount 2 pcs. thimble (nr. 8), as shown on the drawing:

For having 1 wire on 1 release system, mount it in the middle on the forkpart for wirewheel (nr. 3), as shown on the photo:

Release length is determined by the location of the stop screw.

Recommend length is between 18 and 27 cm.

PARTS LIST			
	Article nr.	Description	Pcs.
1	0221-971	GUIDING RAIL FOR RELEASE SYSTEM	1
2	0155-104	PULLEY WHEEL PLASTIC	1

11	33908001	LOCK NUT M8 A2 DIN 985 WAXED	1
12	33510017	NUT M10 A2 DIN 934 WAXED	2

Mounting on feeding pipe:

INSTALLATION OF THE RELEASE SYSTEM

A tension spring should be fitted for each row in order to keep the release system strecht.

No. 0221-366 Screw eye set

Joints between wire and spring wire, use.

No. 0221-970 Wire lock 4 pcs.

No. 09000017 Steel wire Ø3 0,5 m

No. 39402500 Thimble 4 pcs.

The hand winch should be mounted on a wall and is used to open/close the volume dispensers. The hand winch can open up to 60 dispensers.

No. 0152-017 Hand winch

Linak actuator for automatic release of Volume dispenser is mounted on feed pipes or wall. The linak actuator can open up to 60 dispensers,

See price book for further products.

Tensioning and adjusting the release system

1. To reduce strain in the release system, it is recommended that the distance between hand winch and tension springs is as short as possible. This can be ensured by installing a communal main wire and attaching subsidiary wires for individual rows (see layout examples).
2. As the wire stretches when subjected to load, wire should only be used around of pulleys and hand winches. For straight stretches, galvanised spring wire should be used.
3. A tension spring should be installed for each row in order to keep the release system taut.
4. On each row the balls on the volume dispensers should be fitted unequal to prevent simultaneous opening.

RELEASE SYSTEM

Key to symbols

No. 0156-008 Pulley and bracket type G+T

No. 0156-008 Pulley and bracket type G+T

No. 92386 Bracket for displacement of wire 60 mm

Opens up to 60 volume dispensers

RELEASE SYSTEM MOUNTING

It is important to dry out VD5 properly after washing, to prevent caking.

Open volume dispenser and leave the ball hanging so the water can run out.

For the faster drying, take out cover for volume dispenser and open the bottom of the volume dispenser.*

* The bottom of the volume dispenser (hopper) can only be opened if it is mounted on the transparent tube Ø75 mm.
